

## SCREENING OF POLICIES IN ACCORDANCE WITH SECTION 75 OF THE NORTHERN IRELAND ACT 1998

- **Outcome of policies screened between April to June 2023**

Sport Northern Ireland's [Equality Scheme](#) sets out how we intend to comply with the Northern Ireland Equality Act 1998 duties, including the screening of policies for equality implications.

In line with our Equality Scheme you are invited to view the revised policy below and screening outcome, we welcome comments which should be forwarded to [info@sportni.net](mailto:info@sportni.net)

<b>Policy</b>	<b>Policy Aim</b>	<b>Screening Outcome (including any mitigation or alternative policies considered)</b>
Environmental Climate Change Policy	<b>Sport, climate change and environmental sustainability</b>	Screened out without mitigation

The Climate Change Act (Northern Ireland) 2022 sets a Net Zero target by 2050 for Northern Ireland and this strategy recognises the need for adaptation and mitigation measures to work together to address both the causes and potential impacts of climate change.

Sport NI is committed to leading the sports sector to make significant progress on reducing its environmental footprint, contributing to reducing carbon emissions and becoming self-sustaining.
